KINGDOM WOODSLABS:

Our Slabs' USPs:

When it comes to scoring, we harvest trees in the most ethical way possible.

We harvest wood that has been dormant for decades, unlike new wood, which is harvested hastily and lacks the dense grains and old-growth materials that make our stash so unique.

We scour the world for the best score, and our current stash boasts of over 350 slab varieties.

Kingdom Wood Slabs Policy:

At Kingdom Slabs, we take pride in the unique construction and finish of our products. Each of our custom orders is inspected before it leaves the factory as the only imperfections we tolerate are natural ones.

All custom orders have a 3cm production tolerance for width and lengths.

A 50% deposit is required to begin production on all custom orders.

Balances are due before delivery or pick up.

Maintenance

To preserve our natural oil treatment, we suggest that the surface be rubbed lightly with a mild abrasive every six to twelve months with wire wool (000 Grade) or 600 grit sandpaper. Proceed to apply a thin coat of furniture oil with a soft cloth, while making sure to keep the application even.

We have our own automatic sanding, planing & polishing machine, European dryer and experienced craftsmen at your service when it comes to maintaining furniture. After all, we'd do anything for our fellow wood junkies.
